Principles for Collaborative Working

Introduction

Today's business environment is uncertain, volatile and ambiguous - induced by complexity and amplified by technology. Collaborative working has never been more important. The pace of change is accelerating, the challenges organisations face are more numerous and more complex - all amplified by technology. Familiar ways of working are less and less effective. As a result, clarity on core principles, what they mean in practice, and how they lead to value being realised is essential for agility and effectiveness within, and especially between, organisations.

Benefits for your Business

Intuitively we know the value of collaborative working in achieving the alignment, resilience and coherence demanded by complex environments. The key to unlocking that value is to identify and clarify the things that matter (and why they matter) when it comes to collaborative working and to then relentlessly focus on and pursue them.

Who Should Attend

This course is focused on identifying the key principles that will build a foundation for effective collaborative working whether;

- Senior management assessing strategic developments
- Functional leadership developing capability and processes
- Market developers
- Operational managers
- Programme managers and Team leaders

Course Delivery

This one-day interactive course is centred on raising awareness to the key principles which are also found in ISO 44000 and how these collectively support collaborative working:

- Relationship Management
- Visions and Values
- Business Objectives
- Collaborative Leadership
- Governance & processes
- Competence and Behaviour
- Trust & commitment
- Value Creation
- Information & Knowledge sharing
- Risk management
- Relationship measurement
- Exit Strategy
